

Louisiana State University Health Sciences Center

Department of Molecular and Cellular Physiology

2011 Fall Seminar Series

Wednesdays

9:00 a.m.

Room 4-201

September 7	Utpal Sen, Ph.D. Department of Physiology & Biophysics University of Louisville Louisville, Kentucky	Hydrogen sulfide and homocysteine: a tale of two toxins in renovascular remodeling
September 21	Shyamal Bir, Ph.D. Department of Pathology LSUHSC-Shreveport	Hydrogen sulfide therapy rescues critical limb ischemia in aged diabetic animals through an NOS independent NO/HIF-1/ VEGF dependent pathway
October 5	Jamie Newman, Ph.D. Department of Molecular and Cellular Physiology LSUHSC-Shreveport	The Role of SIRT1 in Breast Cancer
October 19	Antoine E. Karnoub, Ph.D. Department of Pathology Beth Israel Deaconess Medical Center Harvard Medical School Boston, Massachusetts	Stromal Mesenchymal Stem Cells in the Pathogenesis of Breast Carcinomas
November 2	Anna Kurdowska, Ph.D. Department of Biochemistry University of Texas Health Sciences Center – Tyler Tyler, Texas	Signal transduction in neutrophils - from bench to bed side
November 16	Gerhard Hildebrandt, M.D. Feist-Weiller Cancer Center & Director of Hematologic Malignancies & Blood and Marrow Transplant Program LSUHSC-Shreveport	The role of azithromycin in the prevention of lung injury after allogeneic stem cell transplantation
November 30	Andrew Yurochko, Ph.D. Department of Microbiology & Immunology LSUHSC-Shreveport	Human Cytomegalovirus Uniquely Integrates Cellular Signaling to Subvert Target Monocyte Function: Role of Integrins and EGFR in Viral Pathogenesis
December 14	Lynn Harrison, Ph.D. Department of Molecular & Cellular Physiology LSUHSC-Shreveport	DNA repair in Mycobacterium marinum
