

LOUISIANA STATE UNIVERSITY HEALTH SCIENCES CENTER  
 Department of Molecular and Cellular Physiology  
**2007 Spring Seminar Series**

Wednesdays

9 a.m.

Room 4-201

January 10	Ryan Wolfort, M.D. Department of Molecular & Cellular Physiology LSUHSC-Shreveport	Immune Cells Mediate Hypercholesterolemia-Induced Vascular Dysfunction
January 17	Hao Wang, Ph.D. Department of Emergency Medicine LSUHSC-Shreveport	Alcohol Affects the Differentiation of B Cell Development
January 24	Satoshi Terao, M.D. Department of Molecular & Cellular Physiology LSUHSC-Shreveport	Obesity and Ischemic Stroke
January 31	Stephan Witt, Ph.D. Department of Biochemistry LSUHSC-Shreveport	Understanding Parkinson's Disease Using Yeast: Degradation of the Mutant A30P Alpha-Synuclein By the Lysosome/Vacuole
February 7	No Seminar (International Stroke Conference)	
February 14	Douglas Wright Department of Molecular & Cellular Physiology LSUHSC-Shreveport	<i>Mycobacterium Tuberculosis</i> DNA End-Joining Proteins: Expression in <i>E.coli</i> and Mammalian Cells
February 21	No Seminar (Mardi Gras)	
February 28	Felipe Gomez, Ph.D. Department of Molecular & Cellular Physiology LSUHSC-Shreveport	MicroPET Imaging for Quantification of Brain Infarction After Ischemic Stroke
March 7	Vijay Shah, M.D. Gastrointestinal Research Unit Mayo Clinic	Portal Hypertension: Nitric Oxide at the Interface of Vasoreactivity and Angiogenesis
March 14	Nigel Mackman, Ph.D. Departments of Immunology & Cell Biology The Scripps Research Institute	Role of Tissue Factor in Hemostasis, Thrombosis and Inflammation
March 21	Laura E. Nagy, Ph.D. Departments of Gastroenterology & Pathobiology Cleveland Clinic Foundation	Innate Immunity in Ethanol-Induced Liver Injury
March 28	Vincent W. Yang, M.D., Ph.D. Department of Medicine Emory University	The Biology and Pathobiology of Krüppel-Like Factors in the Intestinal Epithelium
April 4	Brent Reed, Ph.D. Department of Biochemistry LSUHSC-Shreveport	The Myosin VI Adapter Protein GLUT1CBP (GIPC1): Diverse Interactions Affecting Cell Junctions, Motility, and Protein Sorting
April 11	William Wright Department of Molecular & Cellular Physiology LSUHSC-S	Mechanisms of Blood Flow in the Diabetic Retina
April 18	Maureen Ajuebor, Ph.D. Department of Molecular & Cellular Physiology LSUHSC-Shreveport	The Role of NKT Cells in Viral Hepatitis: What Have You Done for Me Lately
April 25	Gary W. Reuther, Ph.D. Interdisciplinary Oncology Program H. Lee Moffitt Cancer Center	Screening for Myeloid Cell Transforming Genes by Functional Genetics
May 2	No Seminar (EB Meetings)	
May 9	Magda Maracine, Ph.D. Department of Molecular & Cellular Physiology LSUHSC-S	Mitochondrial GSH/GSSG Redox Modulates Quinone-Induced Intestinal Cell Mitochondrial DNA Damage and Apoptosis
May 16	Mitch Kronenberg, Ph.D. La Jolla Institute for Allergy & Immunology	How Do T Cells Respond to Glycolipids?
May 30	D. Neil Granger, Ph.D. and Yijun Jin, Ph.D. Department of Molecular & Cellular Physiology	Ethics in Science
